

Course: “Technological Planning for change and educational transformation”
Valencia - España, 15th - 22th November 2015,

Site: Esclavas del Sagrado Corazón, calle Micer Mascó 1, Valencia

Target: coordinators of Information Technology and Communication of the Istituto di Istruzione Superiore “Giuseppe Luosi” Mirandola, Modena - Italy

Goals:

To obtain the strategic vision and the best practices to design and implement an ICT Plan as support of the educational innovation and change.

Methodology

Through the case study methodology, you will meet models of real plans that have been successfully implemented in schools in our country. You will identify the key dimensions that bring together the main actions of a ICT plan, infrastructure, unique validation systems, school management applications, productivity suite in the cloud, alternative LMS and specific applications for the classroom.

You will learn the keys to reducing the costs of scaling the solution and maintenance of systems and equipment. You will analyze the latest technological trends with good results in education with visits to schools that have already implemented them.

Teachers:

- Miguel Ujeda Gálvez, Head of Pedagogy and Training at [ieducando](#)
- Pedro Díez, CEO of [ieducando](#) Calle Fernández y González 12 bajo, 41001 Sevilla,
